Projects

Complaint Management System for LTO Regional Office (Group Capstone Project)

2026

Technologies: HTML, CSS, JavaScript, Supabase

Developed a complaint management platform for tricycle-related concerns, supporting three user roles: Passengers, LTO Regional Office, and LTMTO. Collaborated with a team to design and implement front-end interfaces and a Supabase-backed database.

Personal NFC Card Webpage

2026

GitHub: djancatibog/nfc-card

Technologies: HTML, CSS, JavaScript, vCard, NFC (NTAG216), Git, GitHub

Designed and built a personal profile webpage that opens when a phone taps an NFC card. The page has a black, minimalist layout with professional links (GitHub, LinkedIn, email), a link to a digital e-portfolio, and social links, plus a click-to-copy email feature.

DMateo's QR Digital Menu (Personal Project)

2026

Technologies: HTML, CSS, JavaScript, GitHub Pages

Built a digital menu website for DMateo's, a family-owned restaurant, that diners open by scanning a QR code. Developed with HTML, CSS, and JavaScript and hosted on GitHub Pages.
